

FIXED GAS DETECTION SYSTEM

C.O.T / LPG / PRODUCT CARRIER SYSTEM

Specification

Sampling point	1~58 sampling points per system, plus 50 points sensor
Sampling time	(1) Complete cycle to be detected less than 30 min. with MSC.1/Circ.1370 Annex 2-2.1
Measurement	Flammable gas (%LEL / %VOL), Oxygen, H2S, NH3, CO2
User interface	Switchboard / Touch screen (10") for choosing sample points, alarm stop & reset, skip, etc.
Alarm Setting	Fully adjustable between zero and full scale
Audible alarm	-95dB @ 30cm
Relay output	Gas alarm, Sensor trouble, Flow fail, Communication fail, Controller trouble, Panel inside and other system abnormal alarm
Communication configuration	RS-485/RS-422 & MODBUS communication
Painting	Powder coating with customer's requirement
Ingress Protection	IP65
Fixing details	Self-standing type / Wall mounting type
Filter equipment	On line filter / Gas inlet port with filter / Air filter MC filter / etc
Power supply	AC220V, 60Hz / DC24V (optional)
Power consumption	Max. 500VA (Alarm condition)
Other function	Auto drain, Counter pressure, Auto/Manual purge, etc. Option : Printer module, Repeater alarm unit with display
Approval	MED, ABS, DNV, KR, RINA type approved LR, BV, NK, CCS are available
Sales refer.	More than 900 vessels
